This handbook is divided into four main sections:

1. to Aviation Weather Services
2. Aviation Weather Forecasts and Advisories
3. Aviation Weather Observations
4. Aviation Weather Dissemination

to Aviation Weather Services

The first section of the handbook provides an overview of aviation weather services. This section covers the different types of aviation weather

services available, the sources of aviation weather data, and the use of aviation weather information in flight planning.

Aviation Weather Forecasts and Advisories

The second section of the handbook covers aviation weather forecasts and advisories. This section provides information on the different types of aviation weather forecasts available, the issuance and use of aviation weather advisories, and the verification of aviation weather forecasts.

Aviation Weather Observations

The third section of the handbook covers aviation weather observations. This section provides information on the different types of aviation weather observations available, the collection and dissemination of aviation weather observations, and the use of aviation weather observations in flight planning.

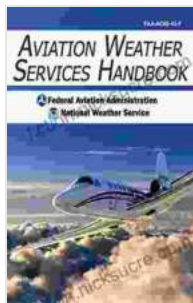

Aviation Weather Dissemination

The fourth section of the handbook covers aviation weather dissemination. This section provides information on the different methods of aviation weather dissemination, the use of aviation weather dissemination systems, and the use of aviation weather information in flight planning.

The Aviation Weather Services Handbook is an essential resource for anyone involved in aviation. This handbook provides everything you need to know about aviation weather services, from the basics of aviation weather forecasting to the latest advances in aviation weather dissemination.

Author Biography

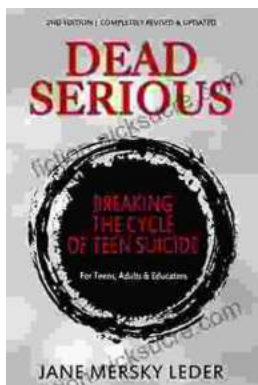

Carolyn Highland is a meteorologist with over 20 years of experience in aviation weather services. She has worked as a forecaster for the National Weather Service and as a consultant for the aviation industry. She is the author of several books and articles on aviation weather.
