Total War: Warhammer is set in the year 2522 IC, during the End Times. The world is on the brink of destruction as the forces of Chaos threaten to overrun it. The player takes control of one of several factions and must lead them to victory against the forces of Chaos and other enemies.

Total War: Warhammer is a complex and challenging game. This guide will provide you with the information you need to get started and succeed in the game.

Getting Started

The first step to playing Total War: Warhammer is to choose a faction. There are four factions available in the base game: the Empire, the Dwarfs, the Greenskins, and the Vampire Counts. Each faction has its own unique strengths and weaknesses, so choose one that suits your playstyle.

Once you have chosen a faction, you will need to start a campaign. The campaign is the main game mode in Total War: Warhammer. It is a turn-based game in which you will manage your faction's economy, build and upgrade cities, recruit and train armies, and conquer new territories.

The campaign map is divided into provinces. Each province is controlled by a faction. You can conquer a province by defeating the faction that controls it in battle. Once you have conquered a province, you will need to build and upgrade cities in order to generate income and recruit new units.

In addition to the campaign, Total War: Warhammer also has a number of other game modes, such as custom battles and multiplayer battles. Custom battles allow you to play against the AI or other players on a variety of maps. Multiplayer battles allow you to play against other players online or over a LAN.

Basic Gameplay

Total War: Warhammer is a turn-based game. Each turn, you will be able to issue orders to your armies and manage your faction's economy. You will also be able to interact with other factions on the campaign map.

When you issue orders to your armies, you will need to choose a stance. The stance you choose will determine how your army behaves on the campaign map. For example, the raiding stance will cause your army to

move quickly and loot enemy territories, while the siege stance will cause your army to lay siege to enemy cities.

In addition to stances, you will also need to manage your army's supplies. Each army has a limited amount of supplies. If your army runs out of supplies, it will start to take attrition damage. You can replenish your army's supplies by moving it into a friendly territory or by using a supply wagon.

Combat in Total War: Warhammer is real-time. When two armies meet on the battlefield, you will need to control your units directly. You will need to position your units carefully and use their abilities effectively in order to win the battle.

Tips for Success

Here are a few tips to help you succeed in Total War: Warhammer:

- Choose a faction that suits your playstyle.
- Start a campaign on an easy difficulty setting.
- Focus on building up your economy and recruiting a strong army.
- Use terrain to your advantage in battle.
- Don't be afraid to ask for help from other players.

Total War: Warhammer is a complex and challenging game, but it is also a very rewarding one. With a little patience and practice, you can master the game and lead your faction to victory against the forces of Chaos.
